An Astrologo-Physicial Discourse.

That the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects and Positions of the Stars, even by Hippocrates and Galen themselves confirmed. Trust then to these Rules Astrological, to be observed for the advantage for the sick;

Let the	{	Sanguine	{	bleed the	{	♈, or ♎.
		Cholerick				♊, or ♋.
		Phlegmatick				♉, or ♌.
		Melancholy				♏, ♐, or ♑.

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Eleaguaries, when the ☾ is in ♊; with Pills, when she is in ♈; with Potions, when in ♍, because the ☾ is posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions, yet sometimes there is a necessity for them; as when the Distemper lyeth above the stomach; it being impossible for a Purge, or purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☾ is in ♋, ♌, or in any good Aspect of ♀, ♑, or ☉.

Glysters are most conveniently administered, when the ☾ is in ♍, ♏, or ♐, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☾ is in any of the Earthly Signs, viz. ♋, ♌, or ♍; of which experience is a valuable witness.

Very proper to Bath, when the ☾ is in ♋, ♏, ♐, or ♈, in Aspect of ♀, or ♀.

Convenient to cut Hair, the ☾ being in ♏, ♉, ♐, or ♈, increasing in Light. And although this be in the opinion of many a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be mended with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

Rules to be Observed in Husbandry, according to Claudius Dariot, from the Stars.

It is not unknown (but by Experience demonstrated) to those that are of Cain's Profession, (viz. Tillers of the Ground) that all Plants, Seeds, and other things, which are produced out of the Earths Bowels; (having her as it were for their common Parent) do receive both increase and decrease by the motion of the Moon, and therefore the Industrious, and careful Husbandman, in Sowing Seeds, planting Trees, in grafting Scions, pruning Vines, tilling his Land, and in other necessary Appendixes to Agriculture, that he may reap Fruit in some measure, answerable to his desired expectation, in the first place, he ought to have a special respect to the state and condition of Saturn that he be not impeded or afflicted, for that he hath chief Dominion over Husbandry, and the Commodities of the Earth. Let him therefore (if you can so order it) be in good aspect of Jupiter or Venus well affected, not Retrograde, Peregrine, or Combust, but in some of his own Dignities, in good aspect of the Moon, altogether free from the Beams of Mars, who, in this Case, ought to be weak, Cadent, Peregrine, Combust, or void of all Dignity as well Essential as Accidental,

Let all manner of Grain or Corn be sowed when the Moon increases, in Signs movable, as Aries, Cancer, Libra, Capricorn, or, if by chance to be in Taurus, Virgo, Sagittarius, Pisces, let her be in Sextile or Trine of Saturn; if your Land be moist, or the Seed of a moist nature that is to be sown, then let the Moon be decreasing in Virgo, Capricorn or Aries, — If your Ground be dry, or the Seed of a like condition, let the Moon be increasing in Cancer or Pisces, in good aspect to Saturn, which together with the Moon should be in some configuration to Jupiter or Venus, — but if your Land that is to be sown be of a middle Condition, that is, between dry and moist, it is then good to sow it, when the Moon is in Libra. Plant what you intend, the Moon being either in Conjunction, Sextile or Trine of Saturn, free from the Body or Beams of Mars in fixed Signs, as Taurus, Leo, Scorpio, Aquarius, and in aspect of Jupiter or Venus.

TRIGGE, 1688.

In planting Trees or vines, let the Horoscope be fixed, and the Moon in some terrene Sign, as Taurus, Virgo or Capricorn, in good aspect of Saturn.

Graft or prune Trees, the Moon decreasing in Aquarius especially, and in aspect to Jupiter and Venus.

Fell Timber for Architecture from November the 22 to January 22, the Moon decreasing in Taurus, Virgo or Capricorn, and let her be in good aspect of Saturn.

Plash Hedges, fell Wood for Fuel, that the stocks may the better grow again, the Moon increasing in Aries or Libra, chiefly the first quarter, Jupiter and Venus assisting.

Cut Vines in February or March, the Moon in Aries, Taurus or Libra. --- Remove Trees when she is in the same Signs, all the last quarter in November, September, or February, and dig Land, to prevent Weeds, in the last quarter.

The Moon in Libra or Aquarius, is good to till Gardens, to sow and set Plants and Herbs; to set Hop-poles and to make a Hop-yard.

Gather Apples, and other Fruits, Herbs and Flowers, to have them fair and beautiful, the Moon increasing toward the Full: to keep and preserve them in store gather them dry, the Moon decreasing, and aspected of Venus or Jupiter.

Shear Sheep, cut down Grass for Hay, the Moon increasing, for it will be a means to make it grow and Spring again the sooner. Kill Fat Swine near the Full, for the Fat will endure boiling the better, and not wast so much as if you kill'd them in the Wain.

Geld Cattle, knit Lambs, the Moon decreasing free from the beams of Saturn or Mars, but in some aspect of Jupiter or Venus.

Of the great use of Starry Influences, let the Reader please to peruse D. Goads Astro-meteorologica wherein he will find variety of instances or proofs of Starry Influences, to his great satisfaction. Also he may read that small Book Entituled Cardines Cæli, wherein the very Country People may learn how to prove good Husbands, and good Huswives from consulting Astrology.

I might here

storians and Chronologers of that Year : But I have not room in this place to discourse of the Nature of Numbers, nor yet of their Mysterious use, I shall leave that Task to be perform'd by some *Trithemius*, or *Agrippa*, who delight to discourse of occult matters. Neither will my Limits give me leave to acquaint you with what Authors have recorded of that notable Year, 1588. It may suffice for me to tell you, (that making Historians and Chronologers the Judges) the Actions of that stupendious Year were very Famous, and did not in the least

TRIGGE, 1688.

disparage the Astrological Prognosticks or Predictions thereof, either by *Regiomontanus*, *Stofler*, or any other that they wrote. This truth you may clearly find by the Writings of *Stow*, *Sir Christopher Heydon*, the Bishop of *Rodez*, and sundry other excellent Authors, that have recorded the Actions of that great Year.

Passing these matters, That which seems most remarkable in this our Vernal Scheme of 1688. Is, that 'tis a Fixed Figure, even in all the Angles thereof, and declares the Fixed and happy condition Great Britain is likely in this Revolution to be blessed withall. And the rather, in regard to the place of the late great Triple Conjunction of *Saturn* and *Jupiter* in *Leo* (the ruling Synod Cælestial of this Age) is now become the Horoscope, and for that the Planets, then united, are now come unto a quadrate aspect, making the first perfect *Crisis* from that famous Congress, and this in Cardinal Signes too; as if the more notable Effects of that Regal Meeting (for so it was) were now by Providence to be brought upon the Mundane Stage, and to be Eminently visible (for good) to these Northern Nations which we inhabit. And this by reason of the great Sympathy, that the Ascendant of *England*, &c. bears to the place of that Triple Conjunction. — It is a Cælestial Congress wherein the most Happy and Friendly Planet *Jupiter*, had the Predominancy of Rule, and Envious-Meagre-Rebellious *Saturn* was under Hatches, being in his greatest Detriment. — Whence, (if I might not offend, and I think I shall distast not but Sullen Ungrateful Saturnists, which is none of my care much to please, I confess;) I would be bold to say, that during this Revolution, Emperours, Monarchs, &c. (chiefly such as are own'd by the Fiery Trigon, and by benevolent *Jupiter*) will shine more then ordinary; And get ground over their Plotting Subjects or Enemys, and be obey'd with great zeal and readiness by their Loyal Subjects, who will with much earnestness be contending how to express their Duty, and to be assisting to them with Heart and Hand. And Government which but of late was little less then Trampled on, will carry an Awe with it, and yet a sweetness too, to such as shall deserve it, that is the Nature of *Jupiter*, Astrologically consider'd: For he bears a Scepter of Mercy for the deserving; So is he not without

without his Thunder for to punish such, as shall by any wilful obstinacy pull his Indignation upon them. To be brief, Authority, and good Order both in Church and State, seem now to get the upper Hand of Madness and Confusion: And Piety, Probity, and good Deeds, will prevail against Schisme, Irreligion, Atheism, Injustice, &c.

I might take notice of sundry other parts of the Scheme, and tell you that there is a Quadrate of *Mars* or *Venus*, from the *M. C.* and 7th. Angle, and an Opposition of *Mercury* to *Saturn* and the *Moon*, and *Jupiter* in Quadrate to them all: as also of the great Trine of *Jupiter* and *Mars*, but an Astrologer must not be too bold and daring — Let all of us learn to be modest and obedient, and look after the things that belong to our peace, (*i. e.*) not to trouble our selves with matters above us, but study to be quiet, and mind our own business. His Majesty hath bin merciful and indulgent to us beyond our merit, hath overlook'd our late monstrous provocations, granted us the Liberty of our Consciences in things purely Religious. What would we have, what can we expect more? Nay, what Monarch on Earth hath ever done the like! He spares our Purse, and takes care of our Souls. Let all good Subjects, therefore, address their Prayers to the King of Heaven, on the behalf of so merciful a Prince, that his Reign may be long over us, and that under him we may always enjoy the blessed Effects of the true *Jupiter's* Nobler Influences, as we have done that of his Vice-gerents under this Famous Celestial Congress.

Secondly, Of the Summer Season.

Summer begins when the Sun toucheth the first Scruple of the Tropick of *Cancer*, at what time (being then at his greatest distance from the Earth) he maketh longest days and shortest Nights to us that live or inhabit on this side of the *Aequator*. And this gallant, comfortable, and refreshing Season, begins this Year in the Latitude of *London*, (for that's the place we chiefly respect in these Essayes, though indifferently it may serve for all *England*,) upon June the 10th day, 4 hours, 26 minutes, P. M. or After-

TRIGGE, 1688.

noon. And a regal Sign ascends the Horoscope as at the Spring. [Tis happy when Cælestial Ingresses harmonize.] *Mars* is in Opposition to *Jupiter* Lord of the Horoscope, and *Saturn* Lord of the 8th. in a Cardinal Sign, in Quadrate aspect to them both. [Of the Influences of Cardinal Signs, you may read a little Treatise, Entituled, *Cardines Cali*, wherein their Energie and force is Illustrated, not only in Rural or Countrey affairs, but in ten remarkable Genitures also.] I spare to mention what Authors say to such Positions. God grant us once free from the effects of the late never to be forgotten Frost, we have had in 1685, and 1686, (years of Drowth and Scarcity) much want of Fruit and Herbage, Root., &c. useful for Food, and 1687 the last year, great and terrible Winds, with an increase of Vermine in several Countreys, as Rats, Mice, &c. doing in some places much harm. Oh, that strong Eastern winds, with unkinde Blites and Mildews, may not now be our portion, us pray,

Thirdly, of the Autumne.

THis Autumnal, or Harvest Quarter is the declining part of the year, and begins when the Sun approacheth the latter Equinox, making days and nights again equal, as he did at the Spring, It commenceth this year on *September* the 12th day, at 7 hours, and 46 minutes in the morning: at which time the Sun riseth in the *East*, with the glorious Planet *Venus*, and the noble Star call'd *Arcturus*.-- Let Monarchs and Monarches the true Images of God and Heaven, be always thus happily Guarded,-- All the Angles of the Figure of this quarter are in Cardinal Signs, and four of the seven Planets in Cardinal Signs also-- Something of Eminent concernment will (according to Astrologers) be acted on the Theatre of the World, to the gladding the Hearts of Christians; possibly somewhat like

TRIGGE, 1688.

total Subversion of the *Turks*, *Libra* hath to do with Christendom: And particularly with the *Austrian* Family, and the Noble Emperour of *Germany*, (as assisted with the Victorious King of *Poland*, the Great and Active Dukes of *Lorraine* and *Bavaria*, &c.) cannot, (if the Stars are to be trusted) fail of very great Victories over the *Ottoman* or *Mahometan* power in this very Revolution.

This quarter continueth all the time the Sun moveth thorough the three first Southern Signs, *viz.* *Libra*, *Scorpio* and *Sagittary*, the first part thereof will be the most active and violent; the second will be more for grave and formal Sieges, or storming some long besieged place or places; the third will be more for Council then Action: and yet some Action that part of the quarter will admit off, though not so Eminent and splendid, as the first part thereof. And thus much shall serve for the quarterly Ingresses, 1688.

Of the Eclipses this Year, 1688.

IN this Year of 1688. Four times will the bright Luminaries of Heaven be Eclipsed to us that inhabit the Earthy Globe, *viz.* Twice the Sun and as often the Secondary Planet the Moon. And they will be Celebrated in the following order.

I. The first Eclipse thereof will be of the Moon, on the fifth day of *April*, about our 6 of the Clock in the Evening? 'Tis Celebrated in 26 degrees of *Libra*, and will (of it self) be a great Eclipse, but not visible to us, because the Moon will then be just going under the Earth.

II. The Second will be a Solar Eclipse, on *April* the twentieth day, about (our) One of the Clock in the Morning; It happens in 11 degrees of *Taurus*, it will be invisible to us, but may be seen of our *Antipodes*, almost in their *Meridian*.

III. The Third will be a *Lunar Deliquium*, on *Michaelmas* day, *viz.* *September* the 29th. near our Ten

TRIGGE, 1688.

a Clock in the Morning, and will be Celebrated in 17 degrees of *Aries*, but invisible in our Hemisphere, the Sun being then above the Earth.

IV. The Fourth and Last will be an Eclipse of the Sun, on *October* the 14th. day, about our 7 a Clock in the Morning. It happens in 2 degrees of the Cælestial *Scorpion*; and the latter part therof may be visible in the Islands of great *Britain*, but the former part cannot, because it will be over before the Sun is fully risen to us. Thus much for the Eclipses this Year, 1688.

It may be expected that I should have said something of the effects of these Eclipses, but forasmuch as 3 of them are Non-visible to us, and the fourth but scarcely to be seen, for the reason before given, their effects cannot concern us, according to the Doctrine of the Learned *David Origanus*, viz. — *Nil nocet Eclipsis illis regionibus, in quibus non videtur.*

It may also be noted, that on the 7th. day of *November* this year, there will be Celebrated a famous Conjunction of *Saturn* and *Mars* in *Scorpio*, in the very first degree thereof, *Scorpio* is the Turkish Horoscope, and therefore the Influences of this Conjunction, and of the Solar Eclipse also, will relate principally to, and fall eminently upon the *Mahometan* Power, both in Court and Camp.

God preserve His Sacred Majesty, the Queen Consort, and all the Royal Family, the Privy Council, Nobles, Gentry and Commonalty of this Realm, this Year and over, Amen.
